PROFESSIONAL SUMMARY

Computer Science student at Duke University with production experience designing backend systems, shipping full-stack features, and building AI-integrated infrastructure across multiple internships.

EDUCATION

Duke University

Bachelor of Science in Computer Science. Duke Kunshan University | Study Abroad, Suzhou, China.

Durham, NC

Expected May 2028

EXPERIENCE

Software Engineering Intern

Tech Hub Africa LLC

May 2026 – Present

Accra, Ghana

- Built and shipped 5+ production features for AfroEventix using WordPress, JavaScript, and custom REST endpoints, improving page-load performance for 1,000+ monthly users.
- Developed AI-assisted tooling that converted stakeholder requests into scoped architecture proposals across 3+ client projects.

Software Engineer, Startup Engineering Lead

Product Manager Accelerator

Mar 2026 – Present

Remote / Boston, MA

- Led engineering for Heiwa, an AI-powered family OS (React, Supabase, Gemini, Firecrawl) parsing logistics from flyers and URLs; owned calendar sync and OAuth integration end-to-end.

Software Engineering Intern

Nexa Consulting

May 2025 – Aug 2025

Nairobi, Kenya

- Designed Python/FastAPI REST endpoints and PostgreSQL data models for a 10K+ user product; added Redis caching and query-index changes to reduce high-latency request paths.
- Implemented JWT authentication and integration tests, raising backend test coverage to 85%+ and reducing production defects.

Full-Stack Software Developer

Body Flex Gyms

May 2024 – Aug 2024

Nairobi, Kenya

- Built payment-processing features for 200+ monthly customers, improving database reliability and billing flow stability.

Corporate Analyst Intern

Equity Group Foundation / Equity Bank Limited

Apr 2022 – Aug 2022

Nairobi, Kenya

- Automated portfolio reporting and tuned SQL joins and indexing across 100+ daily transactions, replacing manual reconciliation.

PROJECTS

Codewright — Automated Bug Fixing & Feature Generation Engine

codewright-zeta.vercel.app

Python, LLMs, Docker, FastAPI, GitHub API

- Built an autonomous coding agent using AST analysis to map repositories, plan patches, and validate changes via parallel test orchestration; achieved 100% patch success rate across 5 repositories.

Semantic Recommendation Algorithm

Python, LangChain, OpenAI, ChromaDB

- Built a RAG recommendation service over 7,000+ books using ChromaDB and LangChain, tuning chunking and retrieval for relevance.

LinguaDetect

JavaScript, REST APIs, franc/cld3

- Shipped a browser extension detecting and translating text across 12+ languages using async batching and caching.

ACTIVITIES & LEADERSHIP

Leadership & Activities

- ColorStack Fellow (2025–Present) | CodePath Fellow (2026–Present) | Global Ambassador, Duke Kunshan University (2024–2025) | Nike Sophomore Scouting Summit (2026) | Varsity Soccer | Secretary, African & Black Students Association

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

Infrastructure & Data: PostgreSQL, Redis, REST APIs, System Design, ChromaDB

Cloud & DevOps: AWS (EC2, Lambda, S3), Docker, CI/CD, Git/GitHub, Linux

Frameworks & AI: React, FastAPI, Node.js, LangChain, RAG, LLM APIs
